Question 1: What is the primary purpose of creating a budget?

A. To track spending and save for future goals
B. To limit spending and prevent financial growth
C. To increase debt and expenses
D. To avoid making financial decisions

Correct Answer: A. To track spending and save for future goals

Explanation: Creating a budget helps individuals or businesses understand where their money is going, set aside savings, and plan for upcoming expenses. It's a proactive tool for financial control, enabling better decision-making and goal achievement. The other options either misrepresent the purpose of budgeting or suggest negative outcomes that are generally avoided through proper financial planning.

Question 2: Which of the following is considered a good investment?

A. A savings account with no interest
B. Stocks with high volatility and risk
C. A diversified portfolio with steady growth
D. An investment that promises guaranteed returns

Correct Answer: C. A diversified portfolio with steady growth

Explanation: A diversified portfolio spreads investments across different asset classes, reducing risk and promoting steady growth over time. Correct Answer: C. Financial loss and failure
