How the Kaufman Speech Praxis Kit Works

The program typically unfolds in stages, aligning with the child's developmental level and

specific speech challenges.

Step 1: Establishing Auditory and Visual Discrimination Before production, children are engaged in activities that sharpen their ability to perceive differences in sounds. Using picture cards and recordings, they learn to distinguish correct pronunciations from errors.

Step 2: Motor Practice of Sounds and Syllables Children practice individual sounds using tactile cues, such as touching the throat or lips, to feel the correct placement and movement. Repetition and modeling are emphasized, with gradual increase in complexity.

Step 3: Combining Sounds into Words and Phrases Once individual sounds are mastered, children practice blending sounds into words, then into phrases and sentences. Visual cues and prompts help facilitate this integration.

Step 4: Generalization and Functional Use The final stage encourages children to use their newly acquired speech skills in natural settings, reinforcing learning through play and everyday conversations.
